The people of New Orleans have taught the world a sublime lesson in the meaning of popular sovereignty. They -mob-the sort of movement for the redres of public grievance which has had men like Jack Cade or Fergus O'Conner at his head is non-existent in the United States. The people here are not the mob, and yet what is called the mob may represent the people. The mob in New Orleans was the people engaged in the discharge of the highest obligation of free citizenhood. The difference between the modern American mob and the mobs of the past of other countries is to be looked for in the elevation and improvement which is perceptible in the condition of the American man of to-day over that of the other days and of other lands. INTERNAL COMMERCE.

Our Immense Domestic Trade and Home Unrivaled Market.

One or two comparisons will convey some idea of our stupendous internal commerce. The tonnage which passed through the Detroit river alone during the 234 days of navigation in 1889 exceeded by 2,468,127 tons the entire British and foreign tonnage which entered and cleared at London and Liverpool that rear in the foreign and constwise trade

The frieght which passed through the DEARMONT as a candidate for County St. Mary's Falls canal in 1890 exceeded by 2.257.876 tons the entire tonnage of all nations which passed through the Suez canal in 1889.

The freight carried on railroads of the United States in 1890 exceeded by over 36,000,000 tons the aggregate carried on all the railroads of Great Britian, Germany, France and Rossia in 1889.

Commodities are interchanged among our own people with greater facility and at cheaper rates, distance being considered, than in any other country on

The increase of national wealth and prosperity, largely due to this system of Protection to our home markets and domestic trade and to the generous development of these instrumentalities of commerce, has become the marvel of the world. Take a few comparisons based No. 16-Burlington Route, leaves at upon the United States census of 1880. and upon figures furnished by Mr. Mulhall, the English statistician.

In manufactures we exceed Great Britian in 1880 by \$1,579,570,191, France by \$2,115,000,000, and Germany by 82,305,000,000

In products of agriculture we excelled have proven that the historical idea of a Great Britain by \$1,425,000,000, France by 8625,000,000, and Germany by 8925,-000,000,

Our earnings or income for 1880 from commerce, agriculture, mining, manufactures, the carrying trade and banking exceeded those of Great Britain from the same sources by \$1,250,000,000, France by \$2,395,000;000, and Germany by \$2,775,000,000.

In 1880 our home markets consumed about \$10,000,000 worth of our own products, an amount equal to the entire accummulated wealth of Spain, three times the increase of wealth in Great Britain for ten years, and seven times the increase of France, for the same seriod. Our home markets that year ab sorbed five times as much of our manufactured products as Great Britaiu exported of hers to all the markets of the world.-From Secretary Windom's last
